

Wildlife Mountain Sanctuary

151 Maso Road Rosebank NSW Australia

13.3.2003

To whom it may concern.

I am a wildlife carer, specialising in Macropods for the past five years. For 2 of those years, I was president of Northern Rivers Wildlife Carers Inc, licensed under the auspices of the National parks and Wildlife Service of NSW. And for the last 2 years I have been the Macropod coordinator of the Northern Rivers region covering some 8000 sq km.

I have known Lynda Staker for the past 3 years, being referred to her for advise in regards to Macropods by my local veterinary clinic, who deems her the leading authority on Macropod rearing, rehabilitation and diseases. Lynda during this time has kindly conducted seminars not only for our group of carers, but also the Northern Tweed and Clarence Wires groups.

Her manual has been an invaluable help to all wildlife carers in Australia, and her invaluable input via the Internet, and bi-monthly newsletter has kept all Macropod carers up to date with the latest scientific information, which she obtains from her close association with research professors.

We are very fortunate to have the voluntary assistance of our veterinary clinics, however they lack the necessary knowledge and training with regards to these highly specialised species, for this reason Lynda's work and tireless efforts, is expanding the knowledge here in Australia, to the benefit of all those who work with these animals.

Should you require any further information or assistance, please do not hesitate to contact me.

Yours faithfully

Susanne Ulyatt
